Deloitte.

Job title: Analyst trainee

About

At Deloitte, you could build a career in cyber risk management, helping some of the leading organizations address evolving risks. Our work is committed to support stronger businesses, a resilient economy, and public security.

You will get an opportunity to work with diverse teams to help design and implement risk-focused insights across industries, gaining exposure to some of the complex organizational challenges and building subject-matter experience.

Please note: This role carries a 12-month probation period from your date of joining.

The Team

Cyber Risk

We help organizations develop a cyber-minded culture, reimagine risks to uncover some of the strategic opportunities, and become faster, more innovative, and more resilient in the face of ever-changing threats. We help provide intelligence and acuity that could dynamically reframe risk, moving beyond a manual, reactive paradigm.

Working across multiple time zones, you will get an opportunity to gain exposure to a variety of technology and cyber risk domains, such as access control, identity, authentication, cyber incident simulations, security testing, ethical hacking, cyber incident response, penetration testing, threat modeling, risk analytics, cloud application security, secure software, forensics, and IT controls, to name a few important areas.

Work you'll do

Your experiences within the role will include:

- Support in improving operational performance by analyzing clients' information technology (IT) controls and processes across security and risk management operations.
- Supporting various live applications related to data privacy and security controls.
- Providing managed services programs through ITIL-aligned processes and approaches to help sustain highly secure and available mission-critical systems and assist in addressing software vulnerabilities.
- Help establishing methods for monitoring "smart" devices connected to enterprise networks.
- Assist in performing continuous monitoring and security analytics as part of the SOC.
- Handling incident response support, troubleshooting, problem-solving, and simplifying complex technical issues for clients as part of operations.
- Help integrating business needs and technology insights, including developing system requirements; designing, prototyping, testing, training, defining support procedures; and implementation.
- Assisting forensic accountants in the detection and measurement of fraud or other violations.
- Querying and mining some of the large data sets to assist in discovering patterns and to help assess them through predictive modeling capabilities.
- Support in assessing clients' controls effectiveness to facilitate reliability in their external financial reporting, compliance with regulations and laws, and in safeguarding their mission-critical assets.

Required qualifications

- B.E./B.Tech in Cyber Security, Information Technology, Computer Science, Software Engineering, or other related branches; or
- M.E./M.Tech in Cyber Security, Computer Science, Information Technology, or Software Engineering; or MCA
- Cumulative Grade Point Average (CGPA) of 60% or equivalent, with no standing backlogs or arrears

Preferred qualifications

- Excellent interpersonal and communication skills (written, verbal, and presentation) to communicate effectively in a global, virtual platform.
- Demonstrated strong sense of ownership, attention to detail, and process adherence.
- Customer-centric approach, with a focus on solving customer-reported issues in the most impactful way.
- Sound analytical and problem-solving skills to identify areas for continuous improvement.
- Moderate computer programming skills, including familiarity with languages such as C, C++,

Java, and Python, as well as foundations in programming, relational databases, networking concepts, and SQL.
- Good working knowledge of Microsoft Word, Excel, and PowerPoint.
- A solid understanding of cybersecurity and risk domains is a definite plus.
- Profound curiosity and agility.
- Inclination toward solving complex and challenging problems is an added advantage.

As part of your role at Deloitte and its related entities, you may be required to work in various shift timings, including night shifts, to support client deliverables. This could also involve working beyond standard hours, including weekends, holidays and from Offshore Delivery Centers (ODC) or Client Location. You may be assigned to projects on different technical platforms and skills, and work at designated locations as determined by the company

Our purpose
Deloitte's purpose is to make an impact that matters for our people, clients, and communities. At Deloitte, purpose is synonymous with how we work every day. It defines who we are. Our purpose comes through in our work with clients that enables impact and value in their organizations, as well as through our own investments, commitments, and actions across areas that help drive positive outcomes for our communities.
